

PRODUCT SPECIFICATION SHEET

Frosted Privacy Film Range

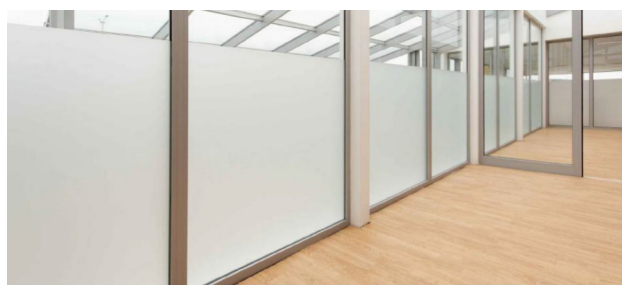

Opal and white frosted privacy films

A clean overview of two privacy films designed to diffuse views while retaining useful natural light. Both are suitable for professional glazing applications in offices, partitions, bathrooms and client-facing interiors.

White Matt Frost

Milky white, more opaque privacy finish with around 80% visible light transmission.

Premium Opal Frosted

Soft opalescent privacy finish that still allows most natural light through.

White Matt ordering

Supplied in 10m rolls and 30m full rolls in 90cm, 122cm, 152cm and 183cm widths. Choose the required width and roll option.

Premium Opal ordering

Supplied in 152cm x 10m rolls or 152cm x 50m full rolls. Choose the required roll option.

Range at a glance

White Matt provides a stronger milky-white privacy finish. Premium Opal provides a softer, more traditional frosted appearance. Both are self-applied glazing films intended to improve privacy without replacing the glass.

PRIVACY WINDOW FILM

White Matt Frost

Product overview

A thinner film than Opal Frost but slightly more opaque. It obscures views through the glass day and night while allowing approximately 80% of visible light through.

Trade ordering

10m rolls and 30m full rolls in 90cm, 122cm, 152cm and 183cm widths.

VISIBLE LIGHT

80% transmitted

INTERNAL WARRANTY

10 years
